

What is claimed is:

1. An all terrain vehicle comprising:
a frame;
a plurality of wheels suspended from the frame;
a support fixedly attached to the frame;
a fender fixedly attached to the support; and
a storage rack disposed above the frame and supported by at least one of the support and the fender, wherein the storage rack comprises at least two separate sections.
2. The all terrain vehicle of claim 1, wherein the storage rack is mounted adjacent to the fender.
3. The all terrain vehicle of claim 1, wherein the storage rack comprises injection molded plastic.
4. The all terrain vehicle of claim 3, wherein the injection molded plastic comprises a polymer and a filler.
5. The all terrain vehicle of claim 4, wherein the filler comprises fibers.
6. The all terrain vehicle of claim 5, wherein the fibers comprise glass fibers with lengths of up to about 1/8 inch.
7. The all terrain vehicle of claim 1, wherein the storage rack comprises a left section and a right section.

8. The all terrain vehicle of claim 7, wherein the storage rack further comprises a center section.

9. The all terrain vehicle of claim 8, wherein the center section comprises a cover with a first side and a second side.

10. The all terrain vehicle of claim 9, wherein the first side of the cover is hingedly attached to the fender.

11. The all terrain vehicle of claim 9, wherein the second side of the cover comprises a latch.

12. The all terrain vehicle of claim 9, wherein the center section is substantially solid.

13. The all terrain vehicle of claim 1, wherein the storage rack comprises a solid portion and a plurality of openings.

14. The all terrain vehicle of claim 13, wherein the storage rack further comprises a plurality of slots and a plurality of positioning holes.

15. The all terrain vehicle of claim 14, wherein at least one of the plurality of positioning holes is in register with at least one hole defined by the support.

16. The all terrain vehicle of claim 13, wherein the solid portion of the storage rack further comprises a top and a plurality of structural ribs.

17. The all terrain vehicle of claim 16, wherein the top is substantially horizontal and the plurality of structural ribs extend general downward from the top.

18. The all terrain vehicle of claim 13, wherein the solid portion of the storage rack further comprises a plurality of strengthening ribs.

19. The all terrain vehicle of claim 18, wherein the plurality of strengthening ribs extend generally downward from the top.

20. The all terrain vehicle of claim 18, wherein the plurality of strengthening ribs are on a bottom of the storage rack.

21. The all terrain vehicle of claim 1, wherein the storage rack is attached to the support by at least one fastener.

22. The all terrain vehicle of claim 21, wherein the fastener comprises:
a pin extending through holes in one of either the fender or the support and the storage rack, the pin having a head that retains the pin when disposed through one of either the support or the fender; and

a grommet disposed adjacent the storage rack, the grommet being releasably attached to the pin to retain the fender and the storage rack against the support.

23. A storage rack for an all terrain vehicle comprising:
a first section; and
a second section,
wherein the first section and the second section comprise injection molded plastic comprising a polymer and glass fibers, the glass fibers each having a length of up to about 1/8 inch.

24. The storage rack of claim 23, further comprising a center section disposed between the first section and the second section.

25. The storage rack of claim 24, wherein the center section comprises a cover with a first side and a second side.

26. The storage rack of claim 25, wherein the first side of the cover is hingedly attached to the fender.

27. The storage rack of claim 26, wherein the second side of the cover comprises a latch.

28. The storage rack of claim 23, wherein the storage rack comprises a solid portion and a plurality of openings.

29. The storage rack of claim 28, wherein the storage rack further comprises a plurality of slots and a plurality of holes.

30. The storage rack of claim 28, wherein the solid portion of the storage rack further comprises a top and a plurality of structural ribs.

31. The storage rack of claim 30, wherein the top is substantially horizontal and the plurality of structural ribs extend generally downward from the top.

32. The storage rack of claim 31, wherein the solid portion of the storage rack further comprises a plurality of strengthening ribs.

33. The storage rack of claim 32, wherein the plurality of strengthening ribs extend generally downward from the top.

34. The storage rack of claim 23, wherein the storage rack is integrally formed with a fender.
